### H2/H2s Treatment - 25 year guarantee

Scientific test results have demonstrated that glue line treated SmartLVL and SmartJoists complying with AS/NZS 1604.2 and AS/NZS 1604.4 are fit for use to provide protection from Termites in **internal, fully protected, ventilated\*** and **External, above ground protected\*** areas of buildings south of the Tropic of Capricorn and where the timber is not exposed to weathering.

\* See definitions in appendix C of AS 1684 or reproduced in SmartLVL and SmartJoist Design Guides

#### This SmartFrame Guarantee:

- I. Applies to SmartLVL 19 H2 Glue line treatments suitable for all parts of Australia and to H2s treatments of SmartLVL H2s and SmartJoist H2s used in Australia south of the Tropic of Capricorn in a hazard class H2s application or lower
- II. Is valid from the date of purchase of the treated timber for a guarantee period of 25 years
- III. Entitles the original owner to have new timber supplied and installed if the treated timber becomes structurally unserviceable through termite attack within the guarantee period.

#### Conditions:

- I. The H2/H2s treated SmartLVL or SmartJoist must have been installed in compliance with the respective SmartFrame Design Guides and BCA regulations applicable at the time of purchase
- II. Proof of purchase and proof of purchase date for the treated timber pieces showing deterioration must be provided at the time of the claim.

Tilling Timber Pty Ltd reserves the right of inspection and verification of any claims made under this guarantee.

#### Excluded from this SmartFrame Guarantee:

- I. Treated timber used in an application higher than hazard class H2/H2s e.g. close proximity to ground or subject to wetting
- II. Treated timber found to be deteriorating due to the effects of fungal decay, normal wear and tear, or damage due to inappropriate use such as, but not limited to, overloading, fire damage or the effects of normal physical wood properties such as warping
- III. Consequential loss or damage however caused.
