SMARTEDGE
information

SMART EDGE

SmartEdge is an crossbanded laminated veneer lumber (LVL) used in concrete construction applications.

SmartEdge is commonly used where concrete slabs require edge formwork or perimeter support, including slab edging, formwork perimeters, and temporary formwork framing. The cross-laminated veneer construction provides a protective mechanism that helps prevent an active capillary effect within the internal layers, reducing moisture movement and minimising cupping while maintaining straight, durable boards for clean and accurate concrete finishes. Each piece is finished with a yellow stain for easy identification on site.

Specifications

- Yellow stain for easy identification
- Water resistant coating to increase durability
- Adhesive rating: A bond
- Emissions: E₀
- Origin Verified as standard across all SmartFrame products
- Third-party product certified by a JAS-ANZ accredited body as being manufactured in conformance with AS/NZS 4357

SmartEdge range:

- 36mm widths – 100, 150, 170, 200, 240, 300mm.
- Available in 6.0m lengths.

SmartFrame Warranty

All SmartFrame Engineered Wood Products (EWP) are covered by our SmartFrame warranty against material and workmanship defects and are guaranteed to perform as specified when stored, installed, and finished in accordance with SmartFrame installation instructions.
