SMARTFORM
information

SMART FORM

SmartForm is an engineered laminated veneer lumber (LVL) used in concrete formwork support structures.

Manufactured from softwood for ease of nailing, SmartForm is used as joists, bearers, walers, and soldiers in conventional soffit formwork and vertical forms for concrete pours across residential and commercial projects. It is sealed with a water-resistant coating to improve durability, extend lifecycle performance, and support repeated use on site. Each piece is painted yellow for easy visual identification and clear product recognition.

Specifications

- Grade: E12
- Adhesive rating: A bond
- Emissions: E₀
- Joint Group: JD4
- Water resistant coating to increase durability
- Origin Verified as standard across all SmartFrame products
- Third-party product certified by a JAS-ANZ accredited body as being manufactured in conformance with AS/NZS 4357
- For spans and specifications, please refer to the SmartForm Design Guides

SmartForm range:

- 95mm x 45mm
- 95mm x 63mm
- 150mm x 75mm
- Lengths available up to 6.0

SmartFrame Warranty

All SmartFrame Engineered Wood Products (EWP) are covered by our SmartFrame warranty against material and workmanship defects and are guaranteed to perform as specified when stored, installed, and finished in accordance with SmartFrame installation instructions.
