SMARTLAM
information

SMART LAM

SmartLam is a high-performance engineered glue laminated timber (glulam) beam, designed for structural applications where strength, long spans, and visual appeal matter - making it a reliable alternative to steel and traditional solid timber.

Built for performance, SmartLam beams are available either pre-cambered or straight to suit the specific requirements of your project.

SmartLam also delivers strong architectural appeal, with a natural timber finish suited to exposed feature beams and open designs. To support this, the range is available in appearance grades A, B and C - where A offers the highest visual finish for premium applications.

All SmartLam products are manufactured in accordance with AS/NZS 1328, ensuring compliance with Australian structural timber standards.

SmartLam Range:

- SmartLam GL13C/GL13S
- SmartLam GL15C/GL15S
- SmartLam GL17C/GL17S
- SmartLam GL18C/GL18S
- SmartLam GL19C

SmartFrame Warranty

All SmartFrame Engineered Wood Products (EWP) are covered by our SmartFrame warranty against material and workmanship defects and are guaranteed to perform as specified when stored, installed, and finished in accordance with SmartFrame installation instructions.
